by a change of Residence from city to country. It is sometimes cured by a fever. Of this I knew an instance in a Lady in this City in whom it had continued 15 years. Also watershed to 100 - D<sup>r</sup> Hudson.

The Ringworm - is produced by an egg deposited on the skin by an insect. It is often taken in Naples. Whole Regiments have thus been affected by it. - hence we find it occupies successively different parts of the body. It is a distemping disease in the Eastern Countries. Volney says it is general in Egypt. When, and it leaves a scar in the face. Its Remedium are. Ink & gunpowder, & diluted OI. —

Leprosy - Is an exanthematous disease. It prevails formerly in Countries now subject to -

= bilious fevers. It is sometimes cholera,  
in common <sup>th</sup> fevers. Its remedies are  
depleting, - at vs purges, & such as promote  
cathartick action as Aconite. Brought about  
by the former 1811 & syphilitic cured by the latter  
in 1810 after 20 years continuance.

+ great care should be taken to examine  
whether the patient has been relieved by it from  
any internal disease as Hippocrate: - asthma  
or Epilepsy or Vertus Dance - all of which have yielded to it,  
in which cases it shd not suddenly be used.

+ on white precipitate;; bogs laid up - or  
if an ointment be objected to - Corros: but in  
water  $\frac{1}{2}$  - This shd be applied to the affected  
parts.

## The Itch

This is a mild disease in our country  
compared with <sup>the north</sup> parts of Europe.  
It is still more mild in the West Indies,  
- where it seldom appears <sup>up</sup> on the fingers,  
but on the posterior only, & only among  
the negroes. It is epidemic in Armishe, pits.

✓ Its Remedies - are Sulphur  
applied to the parts affected - dry - in  
a shirt - or mixed with hogs lard &  
applied to the feet.  
Where Sulphur is objected to, Gal  
Dintment may be used. To render the  
cure of this, & other cutaneous diseases  
complete - the Remedies shd be preserved  
in after the disease disappears.

The Sonia Capitis or scald  
head - is a disturbing disease. It is

and first washing the head with soap  
& water, and applying over it cataplasms  
of powdered charcoal. Much recommended  
by Dr. Thoman. I have used it in two  
cases with success. In one of them it  
cured in a few days. Geo. Lyne

confined chiefly to children. Its remedies are general & local - the former are purges & low diet - the second are cutting of the hair, & if when practicable, shaving the head - tar ointment - or Ung Citrinum. It is often created <sup>dangerous</sup> by lice, and hence it occurs chiefly in children whose heads are seldom combed, - or washed. That lice will produce this disease, we learn from a fact related by Riverius, that he once cured a scrophulous tumor in the neck by putting some lice into his patients, <sup>heads</sup> they created a tamia capitis.

10000 feet high and upward

Collected all the two species  
of birds with 3 species  
of the species, but all in fact, so  
that now one, signified the other  
and there are several species in  
fact the 1st in which was not  
so much of the 2nd but it was the  
second so that it was a 1st  
so there are several several  
species so that this is not the  
only one which is general  
part is considered the same  
as before - according to which  
is one, would in such a case  
be considered species to which

morbus pedicularius or lice.

They occupy not only the head, but a distinct species of them which will not live in the head, occupy the regions, the arm pits, and even the hair which covers the breast. It was a common disease in the 14<sup>th</sup> & 15<sup>th</sup> Centuries.

- It constituted one of the plagues of Egypt.

- It is as much the effect of a want of personal cleanliness, as much as yellow fever is the effect of a want of cleanliness in our cities and upon our farms. Its remedies are a strong decoction of Tobacco - an infusion of Lark Spur in Rum, and a solution of corrosive sublimate.

applied to the skin.

These belong to the discans of the  
Skin. I have nothing to add to what I have  
said of them in the 2<sup>nd</sup> vol. of my Inquiries  
- but that I have since been sceptical in my  
treatment of them in proportion as I have  
considered them as connected with a weak  
or morbid diathesis of the whole system. ✓

Burns - are to be treated as local  
inflamm's on the skin from other causes.  
by us. - purges & low diet, when they bring  
the whole system into system, the parts  
affected are to washed with cold water - lead  
water - and or dressed with the lenient  
poultices & ointments - The King's Steam  
is one of the best. I ~~know~~ Dr Kentish has  
lately recommended his practice. Dr Physick  
Dr Cox speak in high terms of it. In eight  
~~lessens it every answer~~, by deadening sensa-  
tions & morbid actions - But it is unsatisfactory  
large burns. & cold applic's are best in all.

blood vessels of bone and cartilage with no blood vessels, removed

and the cells 1

discuss.

system of physis. Inject them all is causes of disease. Even where they exist they do not stimulate the heart & blood vessels. This is the case with the serum of the blood in the Survey. The supposed vessels of the blood has been found to be owing to the <sup>slow</sup> coagulation of the blood which permits the red particles to fall completely to the bottom of the vessel in which blood is drawn. Putrefaction can have no place in the blood in the blood vessels. This has been ably proved by Dr Lybster in his inangular dissertation.

With another of Germany and the 100, and of a bird, etc. of the

we come next to certain local  
diseases, & disorders which ~~are~~ follow them.

### 1. of the Blood -

It was ~~supposed~~ formerly to be the seat of all  
diseases. ~~considered the blood as passive in health & D~~  
~~diseases. It is the medium through which we have to~~  
~~disseminate of course I expect all the morbid~~  
~~action of the viscosity in the blood, & the~~  
~~viscid, & unctuousness of Dr. Boerhaave's, & Jascike's~~  
all its different appearances as to consistency  
to different degrees of morbid action of the  
blood vessels upon it. — Its different colors  
are owing to different proportions of Oxy-  
-gene, and bile being mixed with it.  
These colors are red - yellow - green, and  
black. — Its slight deviations from  
natural consistency, & color, are  
all to be removed by altering the  
state of the solids by tonics, or

v deficient in its proportions of red  
particles to the loquable lymph and  
serum. when it is excessive depletion by  
fasting will be proper - when from dysle-  
ction nourishing aliment will be proper.

when it is deficient and the  
body has failed not to keep up the  
process of metabolism well - removing  
excess of it in the body affords no  
remedy but purgative and rectifying  
the body to that which  
is natural - several are

depicting ~~so~~ remedies. & It is sometimes  
2 The Secreted fluids are liable to

a deficiency or excess in quantity.

2 to excess in fluidity, or solidity.

3 to a morbid aëriosity. The Remedies  
for ~~as~~ these disorders consist <sup>of</sup> such as  
alter the state of the Solids, and blunt  
aëriosity. The latter I said formerly  
are chiefly indicated in the prisons  
viz. They are Diluting & Demulcent  
drinks, both of which act upon Bill  
and mucous. —

Fatid perspiration - See McCathcart's  
Letter from Connecticut. —

## of the Skin & Hair

I have in another place endeavoured to account for the color of the negroes by supposing it to depend upon a leprosy of a peculiar kind, formed originally in Africa, & propagated from generation to generation, ~~and~~ and thus spread over extensive countries. The Hair is subject to falling out - this is prevented by washing the head with spirits, & by cutting of, and shaving the hair two or three times. 2 To a cessation of its growth. In this case - the ends split. It is cured by cutting those ends off.

✓ colors as far as beauty depends  
the form & colors  
upon color, temperance & exercise  
are calculated to impart it.

for the features of the face.

Deformity is the effect of disorder. It is something portion of bone - or flesh ~~incorrect~~ out of place, or excessive or deficient in quantity. - when this deformity is innate, or of long continuance it is incurable. There are certain physical agents which are calculated to create & improve order in the features of the face. The principal of them are, temperance - exercise, ~~the government~~ of cheerfulness, & a life regulated by reason & Religion. The ingebrious ~~contraries~~ of the Savage, & the big, and changing lips of the negro are both the effects of the

and a goodly number of its growth  
now to be disposed of - it is  
all to be turned to the uses  
of the slaves.

On Super Tuesday morning the world  
was surprised at the results of the  
two contests it at three in the afternoon  
was still in doubt. - I was not more  
surprised at the result on Super Tuesday  
than I was at the result of the  
general election at the election.

It is difficult to conceive what will be next  
- people here I am to think are not  
likely to go and not expect us to make  
out in the middle of the night a number of  
changes in the law and we will be in  
a position to do so. I am not sure of this  
but I am told by several here, who are  
of the opinion that the result of the  
general election is to be decided by the  
electoral college and that the result of the  
general election is to be decided by the

gloomy distress which belongs to this  
mode of life. - cheerfulness of course  
is calculated to prevent each of them,  
above all, passions & conduct regulated  
by reason & religion tend to impart  
stability & dignity to the features and  
countenance - ~~where we observe~~  
~~either stability or dignity or w~~

### Disorders in the cellular membrane

These arise from water - halitus & air.  
we have treated of the 1<sup>o</sup> under dropsy - the  
2<sup>o</sup> occurs in hysteria, & in cases of great debility.  
Its remedy is pressure & friction, with internal  
tonics. Air occurs from wounds in the pleura  
by the ribs, but I suspect it often takes place  
in local & temporary swellings. It is cured like  
halitus by pressure & friction.

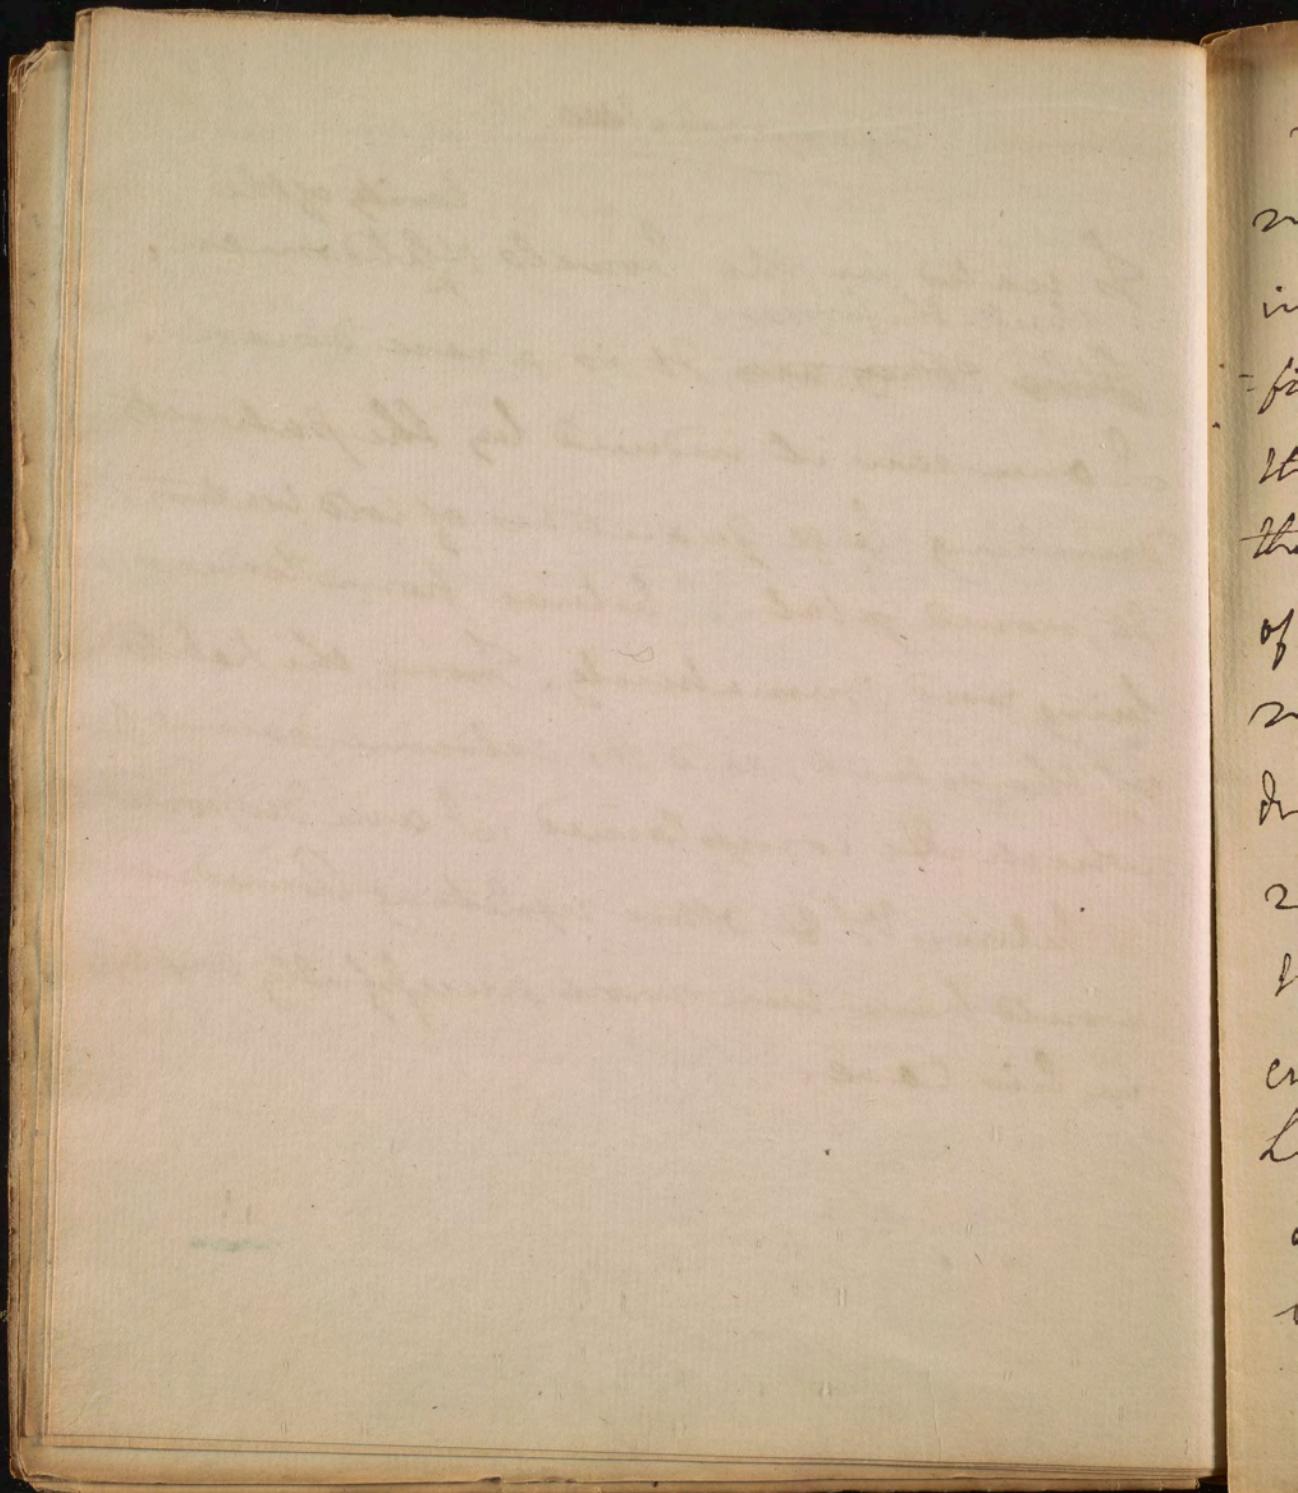

Tympanitis.

Is seated in the Bowels & Abdomen,  
chiefly the former.

Cavity of the

~~It~~ They are It is a rare disease.

I once saw it induced by the patient's  
drinking large Quantities of cold water.  
It proved fatal - I believe from tonics  
being used promiscuously. From the habits  
of the patient, and the extreme pain of  
which he complained, I am disposed  
to believe ~~of~~ of other upsetting Remedies  
would have been more successfully employed in  
in his case.

Upon all the diseases of the Skin that have been  
mentioned I shall <sup>briefly</sup> remark that <sup>they are</sup> ~~they are~~ obstinate  
in proportion as they are insulated, or con-  
fined exclusively to the Skin. By washing  
the Blood vessels by <sup>or low diet</sup> us. we often lessen or cure  
them. ~~say we too do th.~~ You have seen the effects  
of these remedies in the inflam<sup>d</sup> diseases of  
negroes. ~~They~~ often produces a temporary  
diminution of the black color of their skins.  
2 Strong Worms & snakes ~~have~~ often have  
the same effect. The Leprosy it is said is  
caused in S. America by eating Lizards. These  
lizards from the food they eat, are poisonous,  
and act violently upon the stomach and  
bowels.

3 Existing a constant habitual Diarrhea.

& bowels. As it exists most in summer,  
this Chronic Diarrhea promises most  
relief in that season.

4. Diuretics. Recollect the sympathy between  
the skin & kidneys. As it exists most in  
winter, ~~it should~~ this class of medicines shd.  
be given only in cold weather.

5 <sup>Medicines which affect the skin.</sup> ~~Local Applications to the skin.~~ The nutriment  
of the Stomach upon the skin. These are  
bedriffies, Asseptic-Baths - particularly the  
Earth bath. <sup>This is</sup> much commended in the  
hot countries of the East.

6 External Applications to the skin to  
reduce, or <sup>capsize</sup> create natural action in the  
capillary vessels. —
